

3. Temperature

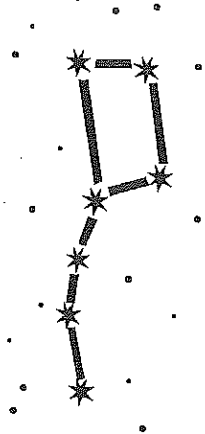

Cool - 3,200 °C
Med - 5,500 °C
Hot - Over 10,000 °C

Characteristics of STARS

2. Color

Red - cool
White - mid
Blue - hottest

4. Brightness (2)

Apparent magnitude -
how bright the stars
appears from Earth

Absolute magnitude -
How bright a star
really is

1. Size

Large - Giants/
Supergiants
Med - ex. Sun
Small - dwarfs
ex. Proxima
Centauri

ex. Betelgeuse
